

WHOLESOME STYLE OF LEADERSHIP

“The only way to deal with an unfree world is to become so absolutely free that your very existence is an act of rebellion.” Albert Camus

“We’re here to put a dent in the universe. Otherwise why else even be here?” Steve Jobs

DEFINITION:

The Wholesome Style of Leadership is closely linked to Vertical Leadership as it relies on the support and companionship of something within us that is far greater than ourselves.

Through this leadership style, we observe the circumstances, inside and outside us, from an elevated perspective which allows us to ‘connect the dots’, ‘sense the big picture’, the ‘underlying thread’ of what’s happening, and participate in it.

This style of leadership is involved in manifesting the greater good. It transcends one’s individual preferences and needs to seek solace in the highest good of all.

Wholesome Leadership means to be open, neutral and present to ourselves and to what is happening around us. Through neutrality, we can expand our perspective, see further into the horizon ahead and contribute to what we see in service to the greater good.

This leadership style asks us to come into acceptance of ‘what is’, so we can use it as leverage towards the greater good in peaceful yet impactful ways.

In business, it means to be attuned to the organization’s vision, mission and values; and to how the organization can contribute to the greater good of the world, community, consumers, employees and shareholders.

The Wholesome Style of Leadership means to play an infinite game with consideration and goodness to all recognizing that the whole is greater than the sum of its parts.

In sacred geometry, it is symbolized by the Circle which represents unity, oneness, wholeness and infinity.

BENEFITS:

1. Promotes unity, harmony, peace and interconnectedness.
2. Provides shared vision, mission and values.
3. Offers opportunity for acceptance, neutrality, cooperation and understanding.
4. Recognizes the big picture, the underlying thread.
5. Promotes holistic-thinking approaches.
6. Develops sustainability, endurance and longevity.
